

# Climate Change

## Windmills

- **Equipment**

Squares of paper, pins (please be thoughtful of safety), dowelling/bamboo poles, tray with sand, pens, recent climate change facts. (<https://climate.nasa.gov/evidence/>)

- **Set up**

Making the windmills can be a tricky task. We would recommend having a leader with this station to help manage the pins and creation of windmills.

Download the instructions card and use this to help you create your windmill.

- **Instructions**

Climate change is becoming more of an urgent issue as we learn about the impact of human actions on creation.

Read the stories and statistics. What is your reaction? What are your hopes for our amazing world? What could we do?

If you want to, you can write or draw your thoughts or prayers on the pieces of paper. As you create your windmill, think about what you could do to make your prayers or hopes a reality.
