

JUBILEE BRACELET BEADS

You will need:

Scrap paper

Scissors

Glue stick

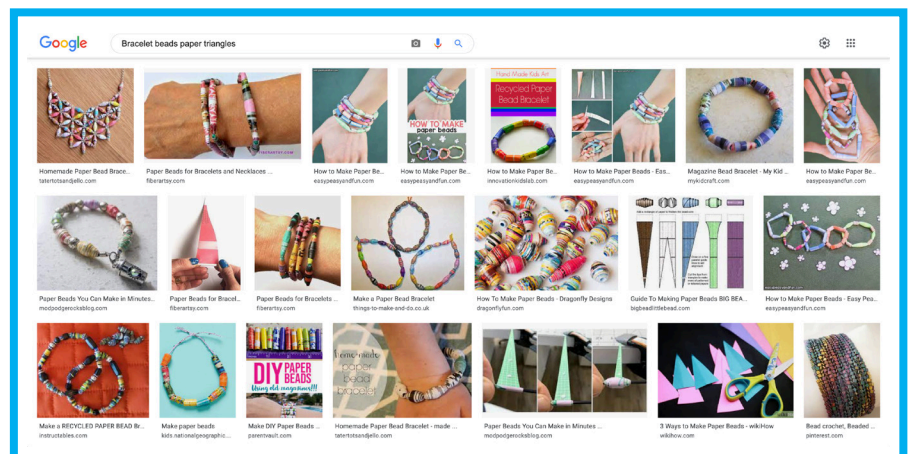

Cocktail sticks

(Paint)

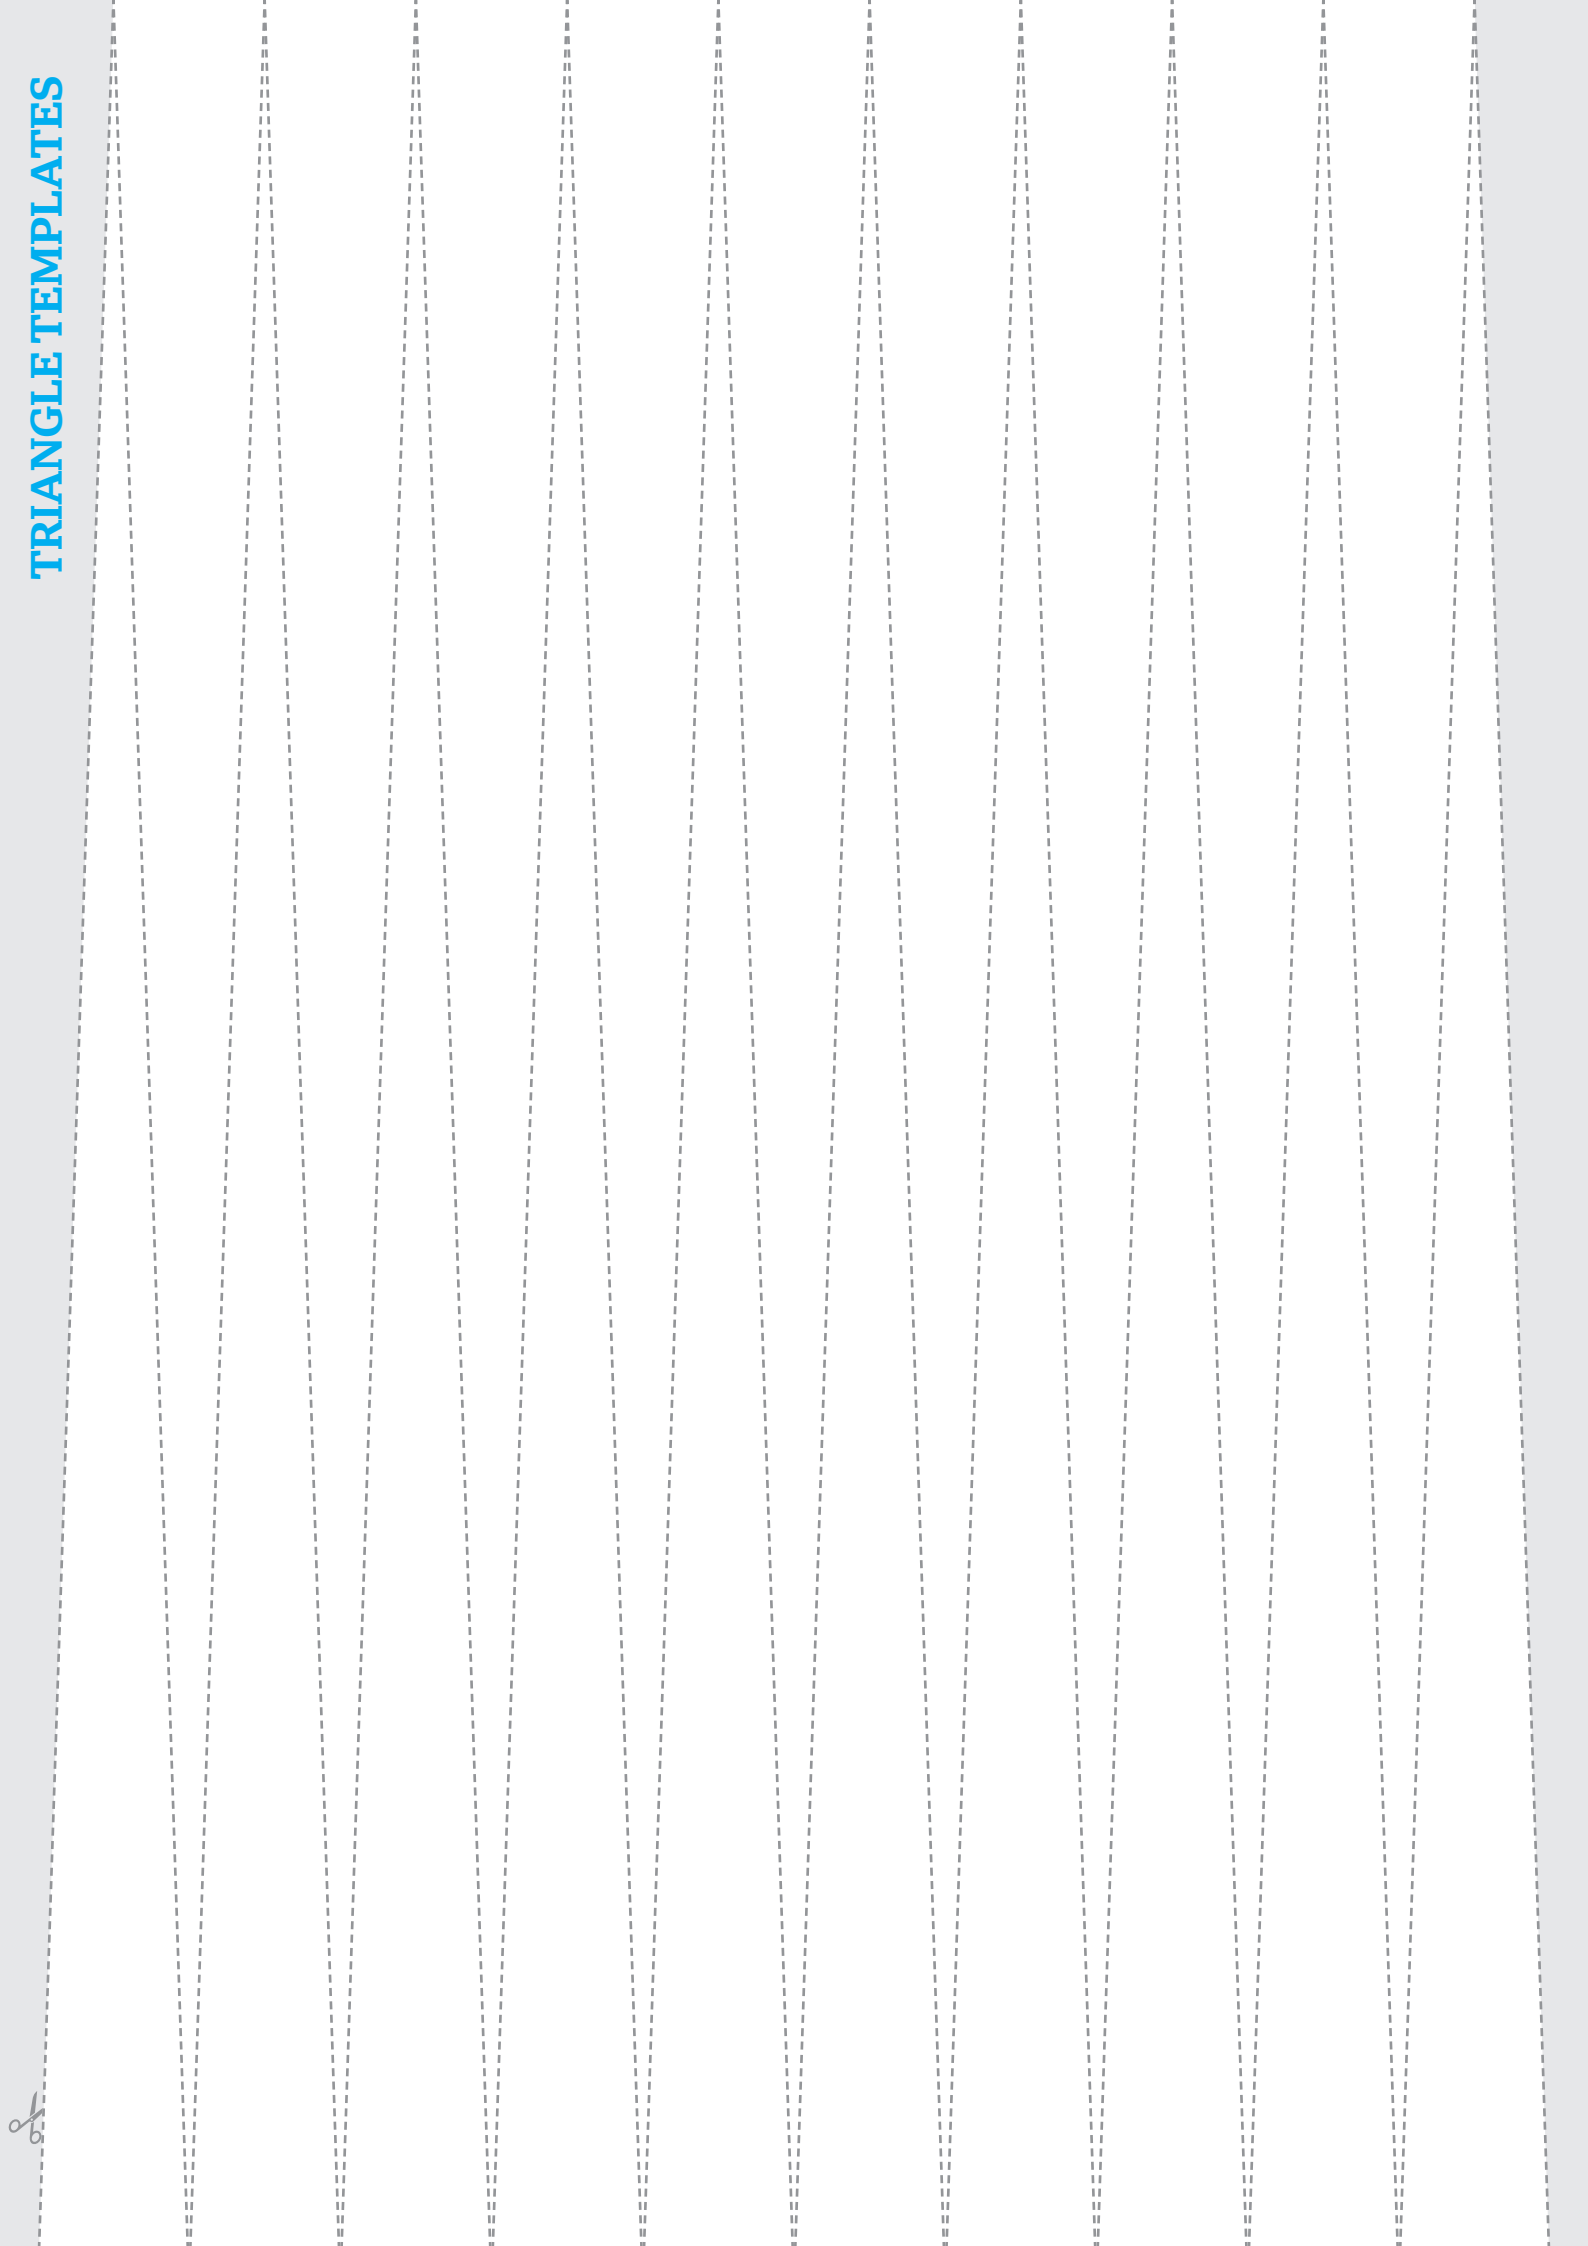

To do:

1. Cut triangles of paper approximately 30 cm long and about 2 cm wide at their widest point.
2. Take each piece of paper in turn and roll it around a cocktail stick from the widest point adding a bit of glue as you go helping the paper to stick together and form a bead.
3. When you have made your beads feel free to paint or colour them if you wish. Feel free to experiment with shape and material to make lots of different types of beads. Use Google (see screenshot below) or other search engines for examples of paper beads!
