Ministerial Disciplinary Process

Members who have attended previous General Assemblies will be aware that there has been an announcement at some point each General Assembly from the General Secretary concerning any Ministerial Disciplinary cases that have been completed since the last meeting of Assembly, and the costs involved. This was a requirement of the previous disciplinary policy, and the last cases under that policy were announced last year. It is no longer a requirement of the policy as adopted by General Assembly and which came into force at the close of Assembly 2022, and therefore there will be no such announcement this year.

The committee will bring the resolutions in groups, as follows:

Resolution 45

The Mission Committee wish to move the resolution in an amended form:

In the light of the continuing and worsening breaches of international law in relation to the occupied Palestinian territory, General Assembly requests that URC Synod Trusts and the URC Trusts and Pensions Funds avoid knowingly investing in Israeli registered companies until such time as Israel once again abides by international law *in respect of its obligations towards the Palestinian territory*.
